Relevant Information

Decree and distribution of dividends

During the third quarter of 2019, *BBVA Bancomer*, *S.A., Institución de Banca Múltiple, Grupo Financiero BBVA Bancomer* (BBVA Mexico) decreed the third installment of the dividend payment at the Ordinary General Shareholders' Meeting, at a rate of \$0.519194741697916 for each outstanding share. The dividend was paid on September 11, 2019.

BBVA Mexico issued Subordinated debt in the international markets

On September 2019, BBVA Mexico issued Subordinated Notes for an amount of 750 million dollars (USD) with a 15-year term (15NC10) and a coupon rate of 5.875%.

Repurchase for the cancellation of Subordinated Notes

On September 2019, BBVA Mexico repurchased and cancelled USD 750 M of the subordinated notes: 2020 and 2021 issuances that were reduced by USD 250 million and USD 500 million respectively.

Management and Discussion Analysis

Commercial Activity

Performing Loans

As of September 2019, the loan portfolio reached 1,180,467 million pesos, equivalent to an annual growth of 5.0%.

Analyzing the business segments, the commercial portfolio grew 1.1% annually. Mainly, driven by a greater dynamism of business loans increasing by 2.8% over the previous year.

On the other hand, consumer lending grew 10.4% in the first nine months of the year compared to the same period of 2018. Inside this portfolio, payroll, personal and car loans showed a 14.0% increase closing with a total balance at the end of September 2019 of 186,200 million pesos. The continued implementation of credit card campaigns was reflected in the acceleration of this product, recording a 4.7% increase in its balance compared to the previous year. This, despite the effect of a large customer base that pay the entire debt balance at the end of the month. In addition, the billing continues to show a positive performance increasing 13.6% in annual terms.

Mortgage loans grew 10.5% on an annual basis, with a balance of 226,178 million pesos at the end of September. This evolution allows BBVA Mexico to remain the leader in the mortgage market by granting one out of four new mortgages in the private sector, according to the public information from the National Banking Commission (CNBV) as of August 2019.

Deposits

Bank deposits (defined as demand and time customer deposits) grew 7.1% on an annual basis. This result is explained by a 3.9% annual growth in demand deposits, while time deposits registered an increase of 10.5% during the same period. However, BBVA Mexico maintains a profitable funding mix with a higher relative weight of low-cost deposits.

Total deposits exceed 1.2 trillion pesos with an annual growth of 5.4%.

¹ Net Interest Margin (NIM) on total assets.

Net Interest Income

Net interest income's (NII) breakdown shows a 5.6% increase on income coming from the banking activity, mainly driven by a greater credit volume of retail segments. When adding financial revenue coming from net repos, the NII grew 6.0% in annual terms.

The 11.7% increase in provisions for loan losses partially derived from the growth of the consumer lending portfolio, which leads to a 4.0% growth in the NII after provisions in the first nine months of the year, compared to the same period of the previous year.

Non-Interest Expenses

Strict expenditure management is reflected in an annual growth of 5.4%. It should be noted, that BBVA Mexico continues to strengthen its physical and digital banking infrastructure with 1,848 offices and more than 13,000 ATMs to serve its broad customer base.

The adequate expenditure management has allowed BBVA Mexico to consolidate its position as one of the most efficient institutions in the financial system, with an efficiency ratio (measured as expenses to income) of 38.2% in the first nine months of 2019, improving by 40 basis points (bps) compared to the previous year.

Capital and Liquidity

BBVA Mexico estimated capitalization index stood at 15.2% at the end of September 2019, composed by 12.0% of Tier 1 capital and 3.2% of Tier 2 capital. The increase of 100 bps compared to June 2019 is mainly explained by the issuance of subordinated debt during this quarter.

BBVA Mexico fully covers the minimum capital requirements. By the end of 2019, BBVA Mexico will have a minimum requirement of 12.0% for total capital ratio, derived from the additional allocation of capital after being classified as a domestic systemically important financial institution (Grade IV).

Regulatory accounting pronouncements recently issued

I. In accordance with the amendments published in the Diario Oficial de la Federación (DOF) of November 15, 2018, the CNBV has modified the following FRS, which had previously been published in DOF of December 27, 2017; this will be effective as of January 1, 2020.

Below is a brief description of the main changes with application on January 1, 2020:

Mexican FRS B-17 "Fair Value Determination"- It defines fair value as the starting price that would be received for selling an asset, or paid to transfer a liability in an orderly transaction between market participants at the valuation date. It is mentioned that the fair value is a market-based determination and not a specific value of an asset or a liability and that, in determining the fair value, the entity must use assumptions that market participants would use when setting the price of an asset or a liability under current market conditions at a certain date, including assumptions about risk. As a result, the entity's intention to hold an asset or liquidate, or otherwise satisfy a liability, is not relevant in determining fair value.

In the event that the provisions contained in this FRS cause changes in the valuation or disclosure of any element of the financial statements, the Institution must comply with the regulatory provisions of each particular FRS that corresponds prospectively.

Mexican FRS C-3 "Accounts receivable" - Main changes issued for this FRS are shown below:

- ➤ It leaves the Bulletin C-3 "Accounts receivable" without effect.
- > Specifies that accounts receivable based on a contract represent a financial instrument, while some of the other accounts receivable generated by a legal or fiscal provision may have certain characteristics of a financial instrument, such as generating interest, but they are not financial instruments themselves.
- ➤ It establishes that the estimate for uncollectibility for trade accounts receivable is recognized from the moment the income is accrued, based on the expected credit losses.
- ➤ It establishes that, from the initial recognition, the value of money over time must be considered, so if the effect of the present value of the account receivable is important in view of its term, it must be adjusted based on its present value. The effect of the present value is relevant when it is agreed to collect the account receivable, in whole or in part, for a term greater than one year, since in these cases there is a financing operation.

The accounting changes that arise must be recognized retrospectively, however, the valuation effects can be recognized prospectively.

Mexican FRS C-9 "Provisions, contingencies and commitments"- It leaves without effect the Bulletin C-9 "Liabilities, provisions, contingent assets and liabilities and commitments", its scope is reduced by relocating the issue related to the accounting treatment of financial liabilities in FRS C-19 "Financial instruments payable" and it modifies the definition of a liability as "virtually

unavoidable" and including the term "likely". First time adoption of this Mexican FRS does not generate accounting changes in the financial statements of the entities.

Mexican FRS C-16 "Impairment of financial instruments to be collected (IFC)"- It indicates that, to determine the recognition of the expected loss, the historical experience of the credit loss entity, current conditions and reasonable and sustainable forecasts should be considered for the different quantifiable future events that could affect the amount of future cash flows to be recovered from the financial instruments receivable (IFC).

It also notes that the expected loss should be recognized when, having increased credit risk, it is concluded that a portion of the IFC's future cash flows shall not be recovered. The accounting changes that arise must be recognized retrospectively.

Mexican FRS C-19 "Financial instruments payable" - The main characteristics issued for this FRS are shown below:

- > The possibility of valuing certain financial liabilities at fair value when certain conditions are met is established.
- ➤ Value long-term liabilities at fair value at their initial recognition
- ➤ By restructuring a liability, without substantially modifying the future cash flows to settle it, the costs and commissions disbursed in this process shall affect the amount of the liability and shall be amortized using a modified effective interest rate, instead of affecting directly the net income or loss.
- ➤ It incorporates what is established in IFRIC 19 "Extinction of Financial Liabilities with Capital Instruments", an issue that was not included in the existing regulations.
- The effect of extinguishing a financial liability must be presented as a financial result in the statement of comprehensive income.
- > Enter the concepts of amortized cost to value financial liabilities and the effective interest method, based on the effective interest rate.

The accounting changes that arise must be recognized retrospectively.

Mexican FRS C-20 "Financial instruments receivable" - The main characteristics issued for this FRS are shown below:

- The way of classifying the financial instruments in the asset is modified, since the concept of intention to acquire and hold them to determine their classification is discarded, instead the concept of the business model of the administration is adopted.
- ➤ The classification includes financial instruments whose objective is to collect the contractual cash flows and obtain a gain on the contractual interest they generate, having a loan characteristic.
- They include both financial instruments generated by sales of goods or services, financial leases or loans, as well as those acquired in the market.

The accounting changes that arise must be recognized retrospectively.

Mexican FRS D-1 "Revenues from clients' contracts" - The most significant changes refer to:

- ➤ Control transfer, based on the opportunity to recognized income.
- > Identification of the obligations to be complied with in an agreement.
- > The allocation of the transaction price between the obligations to be complied with based on the independent sales price.
- > The introduction of the concept of conditioned account receivable.
- > The recognition of rights to collection.
- ➤ The valuation of income.

The initial application date is the beginning of the period in which the Institution applies this rule for the first time.

Mexican FRS D-2 "Revenue, costs from agreements with clients" – The main change in this rule is the separation of the regulations related to the recognition of revenue from contracts with customers from the regulations corresponding to the recognition of costs from agreements with clients.

The initial application date is the beginning of the period in which the Institution applies this rule for the first time.

Mexican FRS D-5 "Leasing"- It is effective from January 1, 2019. Early application allowed for those who use FRS D-1 "Revenue from contracts with customers" and FRS D-2 "Costs from contracts with customers", before the date of initial application of this FRS. It renders the Bulletin D-5 "Leases" void. The application for the first time of this FRS generates accounting changes in the financial statements mainly for the lessee and grants different options for recognition. Among the main changes are the following:

- ➤ Eliminates the classification of leases as operational or capitalizable for a lessee, and the latter must recognize a liability for leasing at the present value of the payments and an asset for use rights for that same amount, of all leases with a duration greater than 12 months, unless the underlying asset is of low value.
- An expense for depreciation or amortization of the right-of-use assets and an interest expense on the lease liabilities are recognized.
- ➤ It modifies the recognition of the gain or loss when a seller-lessee transfers an asset to another entity and leases that asset on the way back.
- ➤ The accounting recognition by the lessor has no changes in relation to the previous Bulletin D-5, and only some disclosure requirements are added.

As of the date of this document, BBVA Mexico is in the process of establishing the effect of the new accounting principles on its financial information.

II. New Financial Reporting Standards issued by the CINIF

The Mexican Financial Reporting Standards Board (Consejo Mexicano de Normas de Información Financiera, A.C.) (CINIF from its Spanish acronym) has issued the Mexican Financial Reporting Standards (Mexican FRS) and Improvements thereto as mentioned below:

Improvements to 2019 Mexican FRS

In December 2018, the CINIF issued a document titled "Improvements to Mexican FRS 2019", which includes specific amendments to some existing Mexican FRS. The main amendments made to the FRS do not generate accounting changes in the annual financial statements.
